

PRACTICA

PRACTICA transplanting machine is extremely precise to transplant conical or pyramidal soil blocks on any kind of soil and the share is equipped with a self cleaning system. The parallelogram structure permits the transplanting uniformity, even if the soil surface is irregular. It is equipped with a single plant tray holder and press wheels. PRACTICA is equipped with a single, round shaped transplanting element with 6 cups. The transplanter is an **agricultural machine**, pulled by a tractor, which allows the seedlings that have previously been obtained in the seedbed to be planted in the ground. Are you looking for **agricultural transplanters** and **agricultural transplanting machines**? Practica is an innovative and reliable solution!
